CAREER OBJECTIVES

A motivated and detail-oriented aspiring backend developer with a strong interest in designing secure, scalable, and efficient software solutions. Dedicated to ongoing enhancement of technical abilities and to keeping up with contemporary development systems and technologies. Looking to develop a successful career as a backend developer and build effective and reliable applications.

EDUCATION

Bsc (Hons) Computing

(2024 - Present)

Islington College

London Metropolitan University

Kamal Marg, Kamalpokhari, Kathmandu

SLC

(2022 - 2024)

National College of Computer Science

National Examinations Board

Paknajol Marg, Kathmandu

SEE

(2020 - 2022)

Siddhartha Vanasthali Institute

National Examinations Board

Banasthali, Kathmandu

SKILLS

Hard Skills

Programming Languages: Java, Python, JavaScript, C/C++

Operating Systems: Windows, Linux

Web Technologies: HTML, CSS

Database management system: MySQL, SQLite

Tools and Software: Git, Github, IntelliJ, Figma, Canva, Eclipse, Jupyter Notebook, Cisco Packet Tracer, VS Code, XAMPP

Framework: Java Servlet, JSP, Pandas, Matplotlib, Bootstrap, Numpy

Soft Skills

Adaptability, Time Management, Teamwork and Collaboration, Communication, Problem-Solving, Critical Thinking

Academic Projects

The E-Spot, an e-commerce website

Java / JSP / JDBC / MySQL / HTML / CSS / JavaScript

A full-stack e-commerce web application featuring product management, user authentication, shopping cart functionality, and order processing through a responsive web interface.

Beauty Store Manager

Python

Developed a Python application for inventory and sales management with file handling and exception management.

Norbu Watches, an e-commerce website

HTML / CSS / JavaScript

A frontend project of a watch e-commerce website where user can browse for watches with ease.

Gym Management Application

Java / Java Swing

An application developed using Java and Java swing for the management of a Gym where two types of member ie, normal and premium can register, give their attendances and also manage their membership.

Jaffinator

C++

An IoT based network awareness tool developed using C++ and Arduino ESP microcontroller.

Homeo

HTML / CSS / JavaScript

A web application similar to Airbnb that enables users to browse, book, and manage hotel and room accommodations with ease.

Personal Projects

AI-CSV — AI-Powered Data Analysis Assistant

Python / Pandas / Streamlit / Matplotlib / Ollama / Llama 3.2

Built an AI-powered CSV analysis assistant using Streamlit and Pandas, enabling dataset exploration, statistical analysis, missing-value detection, and visualization. Integrated a locally hosted Llama 3.2 model via Ollama to provide natural-language explanations of Python-generated analysis results.

Banking Application

Java

Developed a Java-based banking application supporting deposit, withdrawal, and balance inquiry operations using Object-Oriented Programming principles.

CERTIFICATIONS

<u>Responsive Web Design</u>	July, 2026
<u>Career Essentials in Software Development</u>	Feb, 2025
<u>JAVA Essential Training: Syntax and Structure</u>	Feb, 2025
<u>Advanced Java Training</u>	April, 2024
